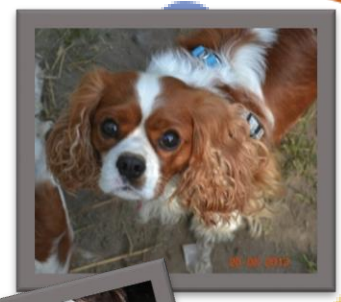
7:30am-9am, $10/day+HST
4pm-5:30pm, $10/day+HST

Animals

Maple Syrup Tapping



Life on the Farm

Waking Up the Farm

This year's thematic content will walk campers through a day in the life on the farm and all the helpers that are included in waking up the farm and preparing for the Spring! Activities will include an intricate look into the behind the scenes of caring for our newborn lambs, how to care for the Maple Trees that line our property and working together to create Maple Syrup horse-drawn sleighs to transport the sap to our very own Sugar Shack. Campers will also explore in the kitchen and make use of the many products that come straight from our and neighbouring farms. Of course, we wouldn't be fully waking up the farm without looking into the very important role our animal helpers play on our Farm team.

This March break Dr. Angela Fountain & Associates is proud to offer a special Child and Youth Day Program for children ages 6-14 years old experiencing social-emotional problems and/or learning disabilities. The program, which runs 9am – 4pm each day, is specially designed to be fun and enjoyable while at the same time providing our young clients with the essentials for developing strong healthy relationships, confidence building and learning practical problem solving skills. Embedded in a thematic week of fun and adventure in a country setting are opportunities for individualized and group skill building in the areas of social skills, anger and anxiety management, impulse control, sustained attention and learning skills.
